(See comments by Bauer & Adler (2001) on the order in which the different printings of the Meyen reports appeared. The volume cited here, according to Bauer and Adler, though stating on the title pages of each of the parts as appearing in the "*Acta Acad. Caes. Leop. Carol. Nat. Cur.* Vol. XVII. P.I." actually appeared before it appeared in the *Acta*. The pages in the volume bear dual pagination numbers, e.g. "436 (186)," the first as it appears in the full volume, the second the already assigned pagination for the *Acta*. Thus, Wiegmann's Amphibian section is numbered 433-435 (actually these pages are unnumbered) followed by 436 (186)-522 (268).
In a like manner the reptile and amphibian plates are dually numbered, LII (XIII)-LXI (XXII). No Southwest Asian records included)
